

# APPLICATION- and PRODUCT DATASHEET

## Fluna Anti Fog

### Anti Beschlag für alle Optiken und Zielfernrohre

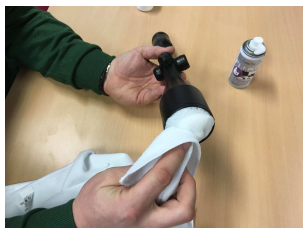

**Fluna Anti Fog** is a solvent-based coating. Fluna Anti-fog prevents the fogging of glass surfaces due to temperature differences, especially at hunting optics such as binoculars, riflescopes and spotting scopes. **Fluna Anti Fog** does not harm special coatings of optics and can be applied easily. The anti-fogging effect lasts for a few days to weeks.

#### Eigenschaften :

- ✓ Suitable for all types of glass
- ✓ Especially optics for hunting
- ✓ Transparent, residue-free, coating
- ✓ Fast, long-lasting effect

#### INSTRUCTION FOR USE :

**Fluna Anti Fog** is always applied to the cleaned and prepared glass surface! Shake bottles before use! Clean glass surface with a brush or pressed air from rough dust. Then clean the surface with **Fluna TFT / Optik foam cleaner**, according to the instructions so that the glass surface is clean and streak-free. Then degrease the glass surface with Fluna Isopropanol according to the instructions for use. Finally, spray **Fluna Anti Fog** lightly on the dry glass surface and allow to work for a few minutes. Using a clean cleaning cloth, polish the product onto the glass surface for a smooth, streak-free coating. Finally, let the glass dry for about an hour. The mode of action of Fluna Anti Fog can be tested with a breath test.
