## Gun Care Kit II

### Fluna GunCoating

... is a heavy-duty ceramic coating for all types of firearms, applicable to all surfaces, e.g. steel, aluminum, plastics, rubber, varnished wood etc. In spite of its excellent lubricating effect, Fluna GunCoating dries off and is free from residue, providing long-lasting protection against abrasion and corrosion. Fluna GunCoating is applicable to all surfaces of the weapon, including barrels, repeating units, pistol slides, systems etc.

**APPLICATION:** Degrease steel surfaces with Fluna GunDegreaser, spray a thin and even film of Fluna GunCoating onto the surface, spread it with a microfiber cloth and allow the film to dry. Treat the barrel correspondingly: apply Fluna GunCoating with a felt pull-through and wipe off excessive material; allow the film to dry. There is no need to de-oil the barrel before firing.

100 ml Aerosol

Art-Nr.: GNO0100120

### Fluna GunDegreaser

... is quick and highly effective in removing greases, oils and lubricants from metal surfaces. Does not affect plastics or rubber. Suitable for all types of rifles, pistols and knives. Ideal as a pre-treatment for Fluna GunCoating or as a supplement to Fluna GunCleaner for removing dissolved metal fouling and paste residues.

**APPLICATION:** Sprinkle Fluna GunDegreaser onto the parts that need degreasing. Clean and wipe the surface thoroughly with a microfiber cloth.

100 ml

Art-Nr.: CRGD100001
